DESIGN & BRAND

GUIDE

OUR COMPANY

Our unique approach brings the best practices from DevOps to Compliance (RegOps) to improve business agility, lower costs, and create compliance super heros.

| 9. | | 17. | |

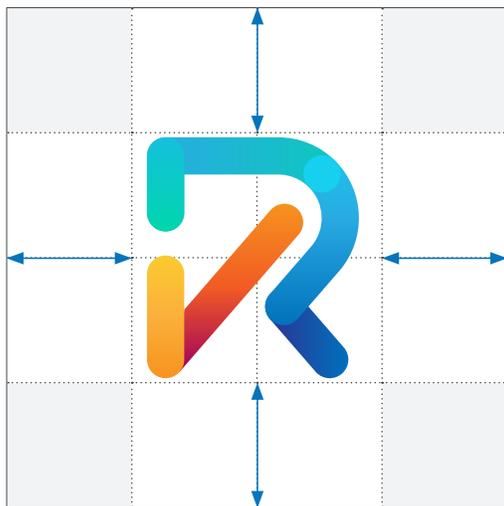

LOGO CONSTRUCTION

Our logo is RegScale's most effective iconic image. It is a brand asset that provides recognition and influence our decisions. Logo communicate what values RegScale intends to represent. They have the power to differentiate us from competitors, instill brand trust, and ultimately, increase profits.

CLEAR SPACE

Standards should be set to distinguish the space around the logo which is referred to as clear space. This helps ensure the distance from other design elements that surround the logo. Ultimately, clear space increases the visibility and impression on the audience.

Never shrink to less than .25"

LOGO VARIATIONS

LOGO VARIATIONS

Variations of our logo allows flexibility to serve different purposes such as print or digital use. They highlight RegScale's personality. Logo variations can even help identify a brand in different settings like a company's website versus partner's website.

PRIMARY LOGO AND LOGO MARK

A primary logo is the foundation for our visual identity, usually consisting of the brand colors and typography. In general, it is a strategic brand tool with the most power to be recognizable for the public. In instances where the traditional logo with text can not be used, we can use simply the R symbol with the same color palette.

LOGO RULES

LOGO CONSTRUCTION

The RegScale logo represents our identity and it is important to display it with as much consistency as possible. This page shows some typical alterations to the logo that can degrade recognition or reduce its clarity. Always remember that the more consistent the presentation of the logo the more powerful it will be.

DO NOT change colors

DO NOT set the logo on a not contrasting background

DO NOT rearrange logo elements

DO NOT use shadows

DO NOT set the logo against dark background

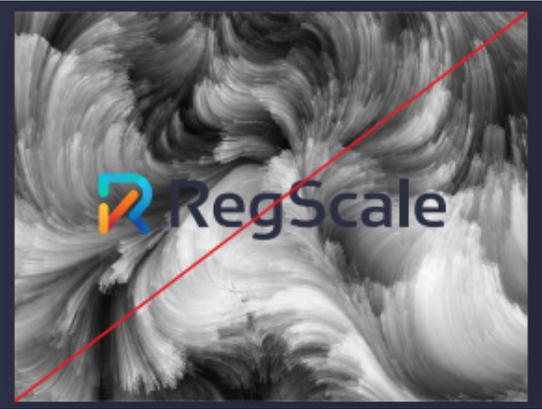

DO NOT stretch or alter the proportions

DO NOT add outlines

DO NOT set the logo against a busy pattern

DO NOT change the typeface

CORPORATE COLORS

Color speaks volumes about a brand. Being an expression of the brand identity, colors influences consumers. As color attracts consumers, they evoke emotions – feelings of warmth, security, excitement, curiosity or home. Emotions drive decisions and that equals profits. Consistent use of color provides a common link between departments, sub-brands and products.

PRIMARY COLORS

Mid Blue

Sentence Case

Montserrat is a geometric sans-serif typeface designed by Argentine graphic designer Julieta Ulanovsky and released in 2011. It was inspired by posters, signs and painted windows from the first half of the twentieth century, seen in the historic Montserrat neighbourhood of Buenos Aires. It is mainly seen in websites and online media, its high readability and ease of scaling make Montserrat a suitable typeface for printed material, such as brochures, signage and even books.

Roboto has a dual nature. It has a mechanical skeleton and the forms are largely geometric. At the same time, the font features friendly and open curves. While some grotesks distort their letterforms to force a rigid rhythm, Roboto doesn't compromise, allowing letters to be settled into their natural width. This makes for a more natural reading rhythm more commonly found in humanist and serif types.

ILLUSTRATIONS

Consistency: Use illustrations that are consistent with the brand's color palette, style, and tone. This will ensure that they align with the overall brand aesthetic and message.

Brand Voice: Illustrations should reflect the brand's voice and personality. Whether the brand is fun and playful or serious and professional, the illustrations should match this tone.

Placement: Consider where and how illustrations will be used in marketing materials, such as on social media, websites, or print materials. They should be placed strategically to enhance the message and draw attention to key points.

Size and Scale: Make sure that illustrations are the appropriate size and scale for the platform and medium they will be used on. They should be easily visible and not overwhelm other elements on the page.

Licensing and Usage Rights: Ensure that illustrations used are either created in-house or licensed for commercial use. Avoid using copyrighted images or illustrations without permission.

RegML: Compliance at the Speed of AI

Intelligent Automation and Precision

Enhance every phase of your control lifecycle with RegScale's AI-enabled CCM platform.

80%

Complete control documentation in minutes

1-click

Control gap assessment scorecard

92%

Less effort to write control implementations

AI Extractor
 Compliance documentation automatically derived from your existing policies and procedures. Get compliant faster, reduce documentation time, and lower AI generate the paperwork for you.

AI Explain
 Simplify the complexity of control statements. Designed to bridge knowledge gaps, our intuitive feature helps the least of compliance, providing users with crystal clear explanation of existing controls. No more second-guessing whether you're a tickler or a seasoned professional. RegML's AI control explanations based on your role, ensuring you grasp the controls more effectively.

AI Author
 Draft control implementation statements in context to satisfy relevant regulations and requirements. Receiving real-time control draft is faster than writing a journal, and this ensures fewer errors and better accuracy.

AI Auditor
 Have the magic wand to evaluate controls on demand and recommend improvements in a single click, saving enormous time and effort. RegML quickly identifies gaps in controls and provides suggestions for precise improvements. This helps your team track for the important stuff, flagging and empowering controls. The result is higher quality control documentation for enhanced audit readiness and confidence.

RegScale supercharges every phase of your control lifecycle with seamless data integrations, self-updating preferences, extreme automation, and advanced AI. Stay always audit ready, reduce costs, and improve your security posture to prepare for a cloud-native and rapidly changing technology landscape.

Market Expansion: Easily Increase Your Control Coverage

Minimize the Cost of New Certifications and Rapidly Expand into New Markets

60%

Reduction in audit prep & response

Fortunes 500 giant struggled to align multiple frameworks including NIST 800-53 without drawing in specialists and redundancies. Their quest for a fast, easy, compliance solution led them to RegScale. The result? A compliance and automation... eliminating excess, propogating gaps, and empowering crystal-clear reporting to their Board.

Subscribed Market: Work Smarter, Not Harder

- **Digitize Data Entry:** Automate data entry and data collection across multiple frameworks.
- **Consolidate Reference:** Manually researching high-level mapping files.
- **Framework Bridge:** End-to-end mapping between frameworks.
- **Regulatory Checks:** Automate compliance checks across multiple frameworks.
- **Audit Agency:** Automate audit agency reporting to their Board.

Mapping History: A Customer's Control Transformation

Faced with the demands of NIST 800-53 compliance, a Fortune 500 giant sought to align multiple frameworks without drawing in specialists and redundancies. The result? A fast, easy, compliance solution led them to RegScale. The result? A compliance and automation... eliminating excess, propogating gaps, and empowering crystal-clear reporting to their Board.

Simply and Future Proof Your Control Monitoring

Supercharge every phase of your control lifecycle with seamless data integrations, self-updating preferences, extreme automation, and advanced AI. Stay always audit ready, reduce costs, and improve your security posture to prepare for a cloud-native and rapidly changing technology landscape.

Automated Controls Mapping - Key Features

Once you've obtained your first certification with RegScale, control mapping will accelerate the next one, and then the next one, continuously and automatically mapping controls to multiple frameworks.

 UCF Integration

 OSCAL-native

 Digitizer: Bring Your Own Catalog

 Transformer

 Reporting / Dashboards

Consolidate your controls, conquer complexity, improve and assist others, then reuse across multiple frameworks to eliminate redundant work and other new markets more rapidly. Stay into the future of compliance where precision means automation and transform your control mapping from manual Excel hell to set and forget with extreme accuracy.

RegML

Control Mapping

Cut Costs and Relieve Audit Fatigue

Effortlessly Audit-Ready at All Times

60% Reduction in audit prep & response

90% Reduction in effort to complete SOC 2 Type 1

Control: A specific measure or action implemented to manage risks, ensure compliance, and achieve desired outcomes.

Evidence Collection Redefined: The Automated Advantage

Evidence collection is a structured method of compiling documentation, policies, procedures, screenshots, and more. Its purpose is to validate that controls are designed to align with stated requirements and effectively mitigate relevant objectives. Streamline the collection of controls evidence using real-time APIs and pre-built RegScale, boosted by event-triggered actions and alerts.

Manual Process

- Manual Logging: Spend countless hours manually gathering, organizing, and uploading evidence from various systems.
- Control Evidence: Manually collect files, screenshots, and screenshots from Word and Excel.
- Error Prone: Increase the likelihood of mistakes and inaccuracies from human data entry and handling.
- Limited Access: Have limited access to necessary data and systems to access data manually or across departments.
- High Costs: Manual processes due to manual, inefficient and error-prone approaches.
- Data Gaps: Miss critical information from constant responses to evidence requests.

CCM Automation

- Centralized System: Utilize RegScale's CCM platform for centralized, continuous evidence collection from various systems.
- Seamless Integration: Seamlessly integrate with existing systems and data sources without the manual hassle.
- Quality Assurance: High-quality evidence, leading to smoother control evidence audits.
- Global Accessibility: Access evidence from any location, on any device.
- Always Audit-Ready: Always ready with a continuous, continuous approach.
- Robust Security: Robust security administration effectively with advanced security measures.

Ready to get started? sales@regscale.com | regscale.com

The RegScale Solution

With our CCM platform of automation, dashboards, and AI tools, RegScale delivers better program costs, enhances security effectiveness, and increases audit readiness between teams.

Build the Evidence | **Collect Evidence** | **Assess** | **Fix the Issues** | **Monitor the Risk** | **Automate**

Automation Platform (APIs, Dashboards, & Analytics)

Automated Evidence Collection - Key Features

- Out of the Box Integrations
- Automation Platform
- Scripts with APIs
- CU for ITGDs

Automated Evidence

Accelerate FedRAMP with RegScale

Speed Time to Authorization with Continuous Controls Monitoring

18 months to 3 and reduce preparation time by **60%**

Accelerate Compliance and Savings

There is a better way to do compliance and RegScale overcomes limitations in legacy CCM by bringing Continuous Controls Monitoring (CCM) platform to your organization's automation, dashboards, and other tools. Deliver longer control cycles, stronger audit trail, and maintain audit readiness between teams. As the only CCM platform to support FedRAMP, RegScale's Open Security Control Assessment Language (OSCAL) platform is designed to generate FedRAMP artifacts. OSCAL cuts down the time to generate artifacts by 60% and automates generation, so your OSCAL action plan can accelerate initial package submission to FIPS in 3 months and reduce preparation time by 60%.

Manual Work

- Manual Work: Manual work to create and submit artifacts to FedRAMP.

Time to Value in 4 Easy Steps

- Create your FedRAMP Plan
- Conduct Assessments
- Export FedRAMP
- Generate FedRAMP Artifacts

What is FedRAMP?

The Federal Risk and Authorization Management Program (FedRAMP), established in 2011, is a cloud-specific security program for the federal government. Based on the Federal Information Security Management Act (FISMA), it is a "streamlined of services" program for the federal government. The U.S. government established the capability to approve cloud-based services for government use.

Why Needs FedRAMP? The Impact

Based on the FedRAMP Authorization Act, signed into law on December 16, 2012, all cloud-based services provided to federal agencies must be approved by FedRAMP. FedRAMP is a program that allows non-federally-authorized communication and the flow of data to make risk-based decisions within the agency. Reviewers get from reviewers to ensure that OSCAL is fully deployed at FedRAMP.

On-going Commitment

Once FedRAMP organizations must engage in perpetual continuous monitoring of controls and regularly submit detailed vulnerability reports and other information for the approval of the ATO.

Accelerate your FedRAMP ATO journey with CCM today. Ready to get started? sales@regscale.com | regscale.com
